EyeNet Vision Business Plan

A comprehensive business plan for an intelligent vision technology platform addressing the $2-4 billion vision analytics market.

Executive Summary

EyeNet Vision is a dual-model (B2B enterprise + B2C consumer) intelligent vision technology platform providing six specialized applications across security, marketing, compliance, and operations verticals.

Document Structure

This business plan is organized into the following sections:

Customer Personas

Detailed profiles of target customers including warehouse managers, educational institutes, industrial facilities, retail owners, and security services.

Competitive Analysis

Comprehensive analysis of EyeNet Vision's commercial product offerings, competitive positioning, and market opportunities.

Platform Functionalities

Core capabilities including computer vision, intelligent triggers, automated actions, and event-driven automation.

Make Business Better

Real stories from real businesses showing how EyeNet Vision improves operations across different industries.

Financial Model

Dual-model revenue strategy with 3-year projections showing growth from $1M to $26M ARR.

Investor Strategy

Investment rounds overview, valuation timeline, and clear exit paths (IPO or strategic acquisition).

Product Roadmap

Development status and launch timeline for all six product applications across deployment modes.

Key Highlights

Investment Opportunity

- **Market Size:** $2-4B addressable market
- **Revenue Trajectory:** $1M (2026) → $8M (2027) → $26M (2028)
- **Target Exit:** $500M-$1B valuation (2029-2030)
- **Business Model:** Dual B2B enterprise + B2C consumer
- **Products:** 6 specialized applications ready for launch

Strategic Advantages

- **Privacy-First**: All processing and storage on-premises
- **Offline-Capable**: Full functionality without internet
- **Infinitely Scalable**: From single camera to enterprise-wide
- **Secure by Design**: Encrypted, access-controlled, VPN-ready
- **Integration-Ready**: REST APIs, webhooks, third-party connectors
- **Event-Driven Intelligence**: Automated actions based on real-time analytics

How to Use This Document

All sections are displayed in sequence below. To generate a PDF, use your browser's Print function (Ctrl+P / Cmd+P) and select "Save as PDF". Each section will start on a new page.

Executive Summary

PPL META PLATFORM

FEBRUARY 15, 2026

Investment Opportunity Overview

EyeNet Vision is raising an **immediate $2.5M Seed round** followed by **$5-7M Series A funding** to scale an intelligent vision technology platform with **six specialized applications** serving a **$2-4B addressable market**. With five products ready for Q2 2026 launch, the company projects growth from **$1M to $26M ARR** by 2028, targeting exit at **$500M-$1B valuation** within 4-5 years.

Company Overview

EyeNet Vision is an intelligent vision technology platform delivering six specialized applications across security, marketing, compliance, and operations verticals. Built on the PPL Meta platform, EyeNet combines proprietary computer vision, demographic analysis, and event-driven automation to transform passive surveillance into active, responsive operational intelligence.

Core Value Proposition

Privacy-first, on-premises vision analytics with real-time automated actions—no cloud dependency, full offline capability, infinitely scalable from single camera to enterprise-wide deployment.

Financial Projections (2026-2028)

Metric	2026	2027	2028
Total Revenue	$1.04M	$8.09M	$26.15M
B2B Revenue	$600K	$4.5M	$14.5M
B2C Revenue	$440K	$3.59M	$11.65M
B2B Customers	50	200	500
B2C Paid Users	600	6,000+	20,000+
Gross Margin	65%	62%	60%
EBITDA	-$360K	$2.4M	$6.7M
YoY Growth	—	**776%**	**223%**

Revenue Mix by Source

Product Portfolio

Product	Target Market	Status	Launch
Intelligent Signage	Retail, Marketing, Events	BETA READY	Q2 2026
Gate Activity	Security, Commercial Buildings	BETA READY	Q2 2026
Room & Gate Protection	Education, Healthcare, Corporate	BETA READY	Q2 2026
Sentinel	Security Firms, Corporate	BETA READY	Q2 2026
Underage Detector	Retail, Restaurants, Bars	BETA READY	Q2 2026
Security Officer Agent	Law Enforcement, Private Security	HARDWARE DEV	Q3/Q4 2026

Investment Opportunity

Immediate Seed Ask

$2.5M

Timing: Q1-Q2 2026 (before Series A)

Series A Ask

$5-7M

Valuation: $20-30M pre-money

Target Exit

$500M-$1B

IPO or Strategic Acquisition (2029-2030)

Series A Return

13x

65% IRR over 5 years

Investor Return Projections (at $750M exit)

Stage	Investment	Return Multiple	IRR (5-year)
Seed	$2.5M	**18x**	**78%**
Series A	$6M	**13x**	**65%**
Series B	$6M	15x	65%
Series C	$20M	4.9x	40%

Competitive Advantages

Technical

- Privacy-first architecture
- Offline capability
- Event-driven intelligence
- Infinitely scalable

Market

- Vertical specialization (6 apps)
- Modular deployment (5 modes)
- Dual B2B/B2C model
- Mobile innovation

⚡ Operational

- Affordable hardware
- Fast deployment
- Integration-ready APIs
- Remote support

Unit Economics

Metric	B2B Enterprise	B2C Consumer
Customer Acquisition Cost (CAC)	$3,000-$5,000	$20-$30
Lifetime Value (LTV)	$144,000	$600-$1,200
Payback Period	3-4 months	1-2 months
LTV:CAC Ratio	**40:1**	**30:1**
Gross Margin	80-85%	70-75%

Market Opportunity

Total Addressable Market: $2-4 Billion

- **Large Retail Chains:** 5,000+ locations (Target: 1,000-2,000 accounts)
- **Security Agencies:** 20,000+ firms (Target: 500-1,000 accounts)
- **Educational Institutions:** 130,000+ schools (Target: 500-1,000 accounts)
- **Commercial Real Estate:** 50,000+ buildings (Target: 1,000-2,000 accounts)
- **Government/Law Enforcement:** 15,000+ agencies (Target: 200-500 accounts)

Target Market Share: 1-2% = $20-80 million revenue opportunity

Use of Funds (Series A: $5-7M)

Category	Allocation	Purpose
Sales Team Expansion	$2.5M (42%)	4 enterprise AEs, 2 SDRs, solution consultants, Salesforce
Marketing Acceleration	$1.5M (25%)	Demand gen, content marketing, events, SEO/SEM
Product Engineering	$1.2M (20%)	Engineering expansion, mobile apps, customer success tools
Working Capital	$800K (13%)	Runway buffer

Key Milestones & Timeline

Growth Trajectory

Q2 2026

Launch 5 Products

50 Customers | $1M ARR

Q2 2027

EBITDA Breakeven

200 Customers | $8M ARR

2028

Profitability

500 Customers | $26M ARR

2029-30

Exit Event

IPO or Acquisition | $500M-$1B

Growth Trajectory Chart

Risk Mitigation

Risk	Mitigation Strategy
Regulatory/Privacy	Modular design allows disabling features by jurisdiction; on-premises deployment
Market Competition	Vertical specialization; 6 applications spread risk; proprietary algorithms
Technology Execution	Software-first approach; 5 of 6 products ready Q2 2026; hardware partnerships
Market Adoption	Conservative penetration assumptions (0.5-3%); diversified customer base
Economic Downturn	Compliance products are non-discretionary; security spending stable

Why Invest in EyeNet Vision?

Strong Investment Thesis

- **Large Market:** $2-4B TAM with growing post-pandemic demand
- **Proven Technology:** Beta-ready products with proprietary algorithms
- **Compelling Economics:** 40:1 and 30:1 LTV:CAC ratios, 3-6 month payback
- **Diversified Model:** B2B enterprise stability + B2C consumer volume
- **Clear Path to Exit:** IPO or strategic acquisition at $500M-$1B valuation
- **Attractive Returns:** Series A investors: 13x return at 65% IRR
- **Experienced Team:** Proven PPL Meta platform track record
- **Defensible Position:** Vertical specialization, proprietary AI/ML, privacy-first

Next Steps

Contact & Investment Inquiry

For detailed investor materials, financial models, and to schedule a product demonstration, please contact:

- **Investment Deck:** Available upon request
- **Financial Model:** Detailed 5-year projections available
- **Product Demo:** Live beta demonstration can be arranged
- **Due Diligence:** Full documentation package ready

Customer Personas & Use Cases

VERSION 2.23.1 JANUARY 15, 2026

System Requirements

For typical installations, Eyenet-vision operates efficiently on standard business hardware:

- **Minimum Hardware:** 16GB RAM, modern multi-core CPU (Intel i5/i7 or AMD equivalent)
- **Operating System:** Windows, Linux, or macOS
- **Storage:** Varies by camera count and retention period (typically 500GB - 2TB)
- **Network:** Standard Gigabit Ethernet (camera dependent)

This modest hardware requirement means most businesses can deploy Eyenet-vision without specialized server infrastructure.

Customer Persona Distribution Chart

Primary Customer Personas

1. Warehouse Manager

Profile

Operations manager responsible for logistics, personnel management, and facility security in warehouses, distribution centers, and storage facilities.

Daily Challenges

- Tracking employee attendance and shift compliance
- Monitoring unauthorized access to restricted areas
- Ensuring safety compliance in high-risk zones
- Managing visitor access and contractor presence
- Investigating security incidents and theft
- Optimizing workflow and identifying bottlenecks

How Eyenet-vision Improves Their Experience

Personnel Attendance Management

- Automatic check-in/check-out tracking without badge systems
- Real-time visibility of who is currently on-site
- Shift compliance monitoring and overtime alerts
- Automated attendance reports for payroll integration

Warehouse Security

- 24/7 monitoring of entry/exit points
- Instant alerts when unauthorized persons enter restricted zones
- After-hours intrusion detection with immediate notifications
- Video evidence retrieval for incident investigation

Operational Intelligence

- Track movement patterns to identify congestion points
- Monitor loading dock activity and efficiency
- Dwell time analysis for process optimization
- Safety zone compliance monitoring (hard hat areas, forklift zones)

Automated Actions & Alerts

- Email/SMS alerts when unauthorized access detected
- Digital signage displaying safety reminders when workers enter hazardous zones
- Automatic incident reports sent to security team
- Webhook integration with access control systems

Warehouse Efficiency Metrics

Value Delivered

- Reduce security personnel costs with automated monitoring
- Eliminate manual attendance tracking and time theft
- Faster incident response with real-time alerts
- Improved safety compliance through automated zone monitoring
- Data-driven decisions for workflow optimization

---

2. Educational Institute Manager

Profile

Campus administrator, security director, or facility manager responsible for student safety, campus security, and attendance tracking in schools, colleges, and universities.

Daily Challenges

- Ensuring student safety at entry/exit points
- Tracking class and lab attendance efficiently
- Preventing unauthorized access to campus facilities
- Managing visitor access and after-hours security
- Responding to security incidents quickly
- Compliance with safety regulations and reporting requirements

How Eyenet-vision Improves Their Experience

Gate & Campus Security

- Automatic detection of unauthorized persons at entry points
- Real-time monitoring of all campus access points
- After-hours activity monitoring with instant alerts
- Visitor tracking and dwell time analysis
- Integration with emergency lockdown procedures

Classroom & Lab Attendance

- Automated attendance tracking without manual roll call
- Real-time attendance dashboards for administrators
- Historical attendance data for academic analysis
- Lab capacity monitoring and safety compliance
- Automatic notifications for abnormal attendance patterns

Attendance Tracking Analytics

Enhanced Safety & Response

- Instant notifications to security when unusual activity detected
- Person-of-interest alerts for known threats or missing persons
- Crowd detection in hallways during emergency evacuations
- Integration with campus alert systems
- Automated incident documentation with video evidence

Operational Efficiency

- Reduce teacher time spent on attendance (5-10 minutes per class)
- Eliminate manual visitor sign-in processes
- Automated reports for compliance and auditing
- Data-driven facility usage analysis

Value Delivered

- Enhanced student and staff safety with proactive monitoring
- Significant time savings for teachers and administrators
- Better resource allocation based on facility usage data
- Improved emergency response with real-time situational awareness
- Complete audit trails for compliance and liability protection

3. ⚓ Industrial Installations & Ships Superintendent

Profile

Operations manager or safety superintendent overseeing industrial facilities, manufacturing plants, offshore platforms, or commercial vessels responsible for personnel safety, access control, and regulatory compliance.

Daily Challenges

- Ensuring only authorized personnel in hazardous work zones
- Tracking crew/worker locations during shifts
- Managing contractor and visitor access
- Emergency muster verification during drills or incidents
- Compliance with safety regulations (ISO, OSHA, maritime law)
- Investigating workplace incidents and near-misses

How Eyenet-vision Improves Their Experience

Personnel Attendance & Accountability

- Automatic headcount at shift start/end
- Real-time visibility of personnel locations across zones
- Emergency muster verification (confirm all personnel evacuated)
- Contractor hours tracking for billing verification
- Visitor access monitoring and time-on-site tracking

Area Security & Access Control

- Restricted zone monitoring (control rooms, machinery areas, cargo holds)
- Instant alerts when unauthorized access detected
- After-hours facility monitoring
- Perimeter security for industrial sites or vessel decks
- Integration with badge/RFID systems for dual-factor verification

Safety Compliance & Incident Prevention

- Monitor PPE compliance in safety zones (hard hat detection)
- Dwell time alerts in hazardous areas
- Lone worker monitoring with inactivity alerts
- Slip/trip/fall detection zones
- Automatic incident documentation with video timeline

Safety Compliance Dashboard

Operational Intelligence

- Workflow efficiency analysis across production zones
- Bottleneck identification in manufacturing processes
- Equipment usage correlation with personnel presence
- Shift changeover efficiency tracking

Value Delivered

- Enhanced personnel safety with real-time zone monitoring
- Regulatory compliance with automated documentation
- Reduced safety incidents through proactive alerts
- Improved emergency response with accurate personnel location data
- Cost savings through optimized security personnel deployment
- Complete audit trails for incident investigation and insurance claims

4. Retail Shop Owner - Customer Analytics & Product Intelligence

Profile

Store owner or manager focused on understanding customer behavior, optimizing store layout, and improving product merchandising through data-driven insights.

Daily Challenges

- Understanding customer traffic patterns and peak hours
- Measuring product engagement and shelf performance
- Optimizing store layout and product placement
- Identifying high-value customer segments
- Justifying marketing spend with concrete data
- Competing with e-commerce through better in-store experiences

How Eyenet-vision Improves Their Experience

Gate People Counting with Demographics

- Automatic customer count at entry/exit
- Traffic pattern analysis (hourly, daily, weekly trends)
- Demographic breakdown (age ranges, gender) of visitors
- Conversion rate calculation (visitors vs. transactions from POS integration)
- Peak hour identification for staff scheduling optimization
- Customer dwell time and visit duration analysis

On-Shelf Product Analytics

- Camera-based monitoring of product displays
- Product engagement metrics (how many people stop, how long they look)
- Demographic analysis of who engages with specific products
- Shelf optimization insights (hot zones vs. cold zones)
- Product placement effectiveness measurement
- A/B testing for merchandising changes

Customer Analytics Dashboard

Marketing Campaign Support

- Measure foot traffic before/after marketing campaigns
- Demographic verification (are we reaching target audience?)
- Time-to-visit analysis after promotion launch
- Geographic footfall patterns (if multiple locations)
- Window display effectiveness measurement

Customer Journey Mapping

- Track customer paths through store
- Identify most visited areas vs. neglected sections
- Measure time spent in different departments
- Correlate demographics with shopping patterns
- Optimize store layout based on natural traffic flow

Value Delivered

- Data-driven merchandising decisions (increase sales 15-25%)
- Optimized staffing based on accurate traffic predictions
- Better marketing ROI through demographic verification
- Competitive advantage through deep customer insights
- Store layout optimization for improved customer experience
- Objective measurement of product placement effectiveness

---

5. Retail Shop Owner - Digital Signage Integration

Profile

Retail manager or marketing director using digital displays for advertising, promotions, and customer engagement, seeking to make signage interactive and audience-responsive.

Daily Challenges

- Generic content shown to all customers regardless of demographics
- Unable to measure signage effectiveness
- Manual content scheduling is time-consuming
- Missed opportunities for targeted messaging
- No data on customer engagement with displays
- High cost of static signage updates

How Eyenet-vision Improves Their Experience

Intelligent Digital Signage Management

- Automatic content switching based on detected demographics
- Real-time audience analysis (age, gender, group size)
- Engagement measurement (how many people look, for how long)
- Time-of-day content optimization
- Occupancy-based content selection (empty store vs. crowded)

Demographic-Targeted Content

- Show age-appropriate products and promotions
- Gender-specific advertising when relevant
- Family-oriented content when children detected
- Premium product showcasing for estimated high-value demographics

- Language selection based on demographic indicators (if applicable)

Digital Signage Effectiveness

Performance Analytics

- Measure impressions (how many people viewed each content piece)
- Engagement rates (viewing duration, interaction)
- Content effectiveness comparison (A/B testing)
- Demographic response analysis
- Conversion correlation (signage exposure vs. sales)

Value Delivered

- Increased relevance of advertising content (20-40% better engagement)
- Measurable ROI on digital signage investment
- Reduced content management time through automation
- Better customer experience with personalized messaging
- Data-driven content strategy optimization
- Competitive differentiation through interactive retail experience

---

6. Security Services (Public & Private)

Profile

Security director, operations manager, or agency owner providing security monitoring and personnel services for multiple sites, facilities, or public spaces. Includes private security firms, municipal security departments, and corporate security teams.

Daily Challenges

- Monitoring multiple locations with limited personnel
- Rapid response to security incidents
- Identifying persons of interest in real-time
- Maintaining comprehensive coverage of large areas
- Providing detailed incident reports and evidence
- Managing security staff deployment efficiently
- Ensuring compliance with security contracts and SLAs

How Eyenet-vision Improves Their Experience

Multi-Site Operational Coverage

- Centralized monitoring dashboard for all client locations
- Remote access to all camera feeds from single interface
- Automatic detection of unusual activity across sites
- Real-time site status and occupancy monitoring
- Coverage gap identification and optimization
- Historical data for pattern analysis and threat prediction

Instant Detection & Notifications

Person of Interest Alerts

- Real-time facial recognition for known threats or wanted persons
- Automatic alerts when POI detected (email, SMS, mobile push)
- Multi-camera tracking when POI moves between zones
- Historical search ("Has this person been here before?")
- Integration with law enforcement databases (where legally permitted)

Threat Detection

- Unauthorized access to restricted areas
- After-hours intrusion detection

- Loitering detection in sensitive areas
- Crowd formation monitoring for public safety
- Unusual movement patterns indicating suspicious behavior
- Perimeter breach detection

Security Response Time Analysis

Rapid Response Coordination

- Instant notifications to response teams with location data
- Video evidence automatically captured and stored
- Real-time situational awareness for responding officers
- GPS-based nearest-guard deployment
- Integration with dispatch systems via webhooks

Comprehensive Incident Documentation

- Automatic video evidence collection for incidents
- Timeline reconstruction of events
- Multiple camera angle compilation
- Audit trail for chain of custody
- Automated incident reports for clients
- Compliance documentation for legal proceedings

Value Delivered

- Enhanced security coverage with same or fewer personnel
- Faster incident response (reduce response time by 40-60%)
- Proactive threat detection vs. reactive monitoring
- Reduced false alarms through intelligent filtering
- Better client satisfaction with data-driven reporting
- Competitive advantage through technology-enabled services
- Scalable operations (more sites without proportional staff increase)
- Compliance with security standards and legal requirements
- Cost reduction through optimized guard deployment

Cross-Persona Benefits

Technical Advantages

- Easy Deployment on standard hardware
- Local Control - no cloud dependency
- Offline Capable - full functionality
- Secure by Design - encrypted & VPN-ready

Operational Advantages

- Scalable - 1 to 100s of cameras
- Flexible - diverse industries & use cases
- Intelligent - automated triggers
- Integrated - connects via webhooks/APIs

Business Advantages

- Cost-Effective - no recurring cloud fees
- ROI-Positive - 6-18 month payback
- Privacy-Compliant - local processing
- Future-Proof - modular architecture

ROI Timeline Comparison

Implementation Pathways

Start Small, Scale Up

Most customers begin with:

1. **Pilot Phase:** 2-4 cameras covering critical areas
2. **Proof of Value:** 30-90 days demonstrating ROI
3. **Expansion:** Additional cameras and advanced features
4. **Integration:** Connect with existing business systems

Hardware Scaling Guide

Camera Count	Hardware Requirement
1-10 cameras	Single workstation (16GB RAM, quad-core CPU)
10-30 cameras	Dedicated PC (32GB RAM, modern CPU, SSD storage)
30-100+ cameras	Server-grade hardware or distributed deployment

The software automatically adapts to available hardware, making scaling seamless.

EyeNet Vision: Commercial Product Analysis

Competitive Intelligence Report

Source: https://eyenet-vision.com/
Analysis Date: February 15, 2026
Company: EyeNet Vision - Automated Vision Solutions

Executive Summary

EyeNet Vision is a comprehensive intelligent vision technology platform providing six specialized applications designed for security, marketing, compliance, and operations management. Their solution architecture includes five deployment modes (Spot, Gate, Area, Goggles, Drone) that can be customized for diverse operational environments.

Platform Architecture Overview

Platform Architecture Overview

Core Value Proposition

> ***"Don't just protect your assets — see them protected."***
> ***"Eyenet makes the unseen visible."***

EyeNet delivers an integrated vision intelligence platform with:

- Demographic analysis and age/gender detection
- Real-time threat detection and alerts
- Behavioral analytics and crowd dynamics
- Facial recognition for persons of interest
- Access control and attendance management
- Automated reporting and compliance documentation

Stakeholder Value Map

Stakeholder Value Delivery

1. Business Owners & Executives

- Comprehensive analytics for oversight
- Asset protection and compliance assurance
- Data-informed decision making
- Profitability and operational excellence optimization

2. Security Managers & Personnel

- Real-time automated threat detection
- Streamlined incident response
- Enhanced situational awareness
- Consistent, reliable monitoring

3. Marketing & Sales Teams

- Real-time demographic insights
- Targeted content delivery
- Campaign optimization
- Customer behavior analysis

4. Operations & Facilities Managers

- Attendance monitoring and access control
- Crowd dynamics analysis
- Safety standards maintenance
- Space utilization optimization

Product Portfolio

1. Intelligent Signage

Overview

Transforms digital displays into intelligent marketing platforms with demographic-driven content delivery and real-time audience analytics.

Description

This application converts traditional digital signage into a dynamic, data-driven marketing tool by analyzing viewer demographics (age and gender) to automatically serve targeted advertisements and media, maximizing engagement and campaign effectiveness.

Key Features

- **Automated demographic-based content delivery** - Displays content based on viewer age and gender
- **User-friendly web interface** - Easy media upload and assignment by owners and marketing collaborators
- **Activity insights add-on** - Comprehensive reports including demographics, traffic counts, and activity heatmaps
- **Real-time audience analytics** - Continuous monitoring of viewer engagement

Deployment Modes

- **Spot Mode:** Fixed, close-range areas such as POS counters and product displays
- **Gate Mode:** Entrances, exits, and corridors for traffic analysis
- **Area Mode:** Large spaces including retail environments

Target Market

- Retail shops
- Shopping malls
- Airports
- Advertising agencies
- Event venues
- Marketing firms

Market Positioning

Premium positioning in the digital signage market with ROI focus on improved customer engagement, conversion rate optimization, and campaign effectiveness measurement.

Intelligent Signage ROI Metrics

---

2. Gate Activity

Overview

Advanced security monitoring for entrances and corridors with crowd analytics, threat detection, and comprehensive behavioral insights.

Description

A robust security and operational tool designed to monitor people activity in gates, entrances, exits, and corridors. It provides real-time data and security alerts, enabling businesses to understand crowd dynamics and respond to security events proactively.

Key Features

- **Real-time people counters** - Live crowd size monitoring
- **Demographic analysis** - Age and gender distribution tracking
- **Activity heatmaps** - Visual representation of traffic patterns
- **Advanced crowd behavior metrics** - Behavioral analysis and pattern recognition
- **Instant notifications** - Alerts for abnormal crowd activity
- **Facial recognition** - Person of interest identification and tracking
- **Live video streaming** - Annotated real-time feeds
- **Flexible video storage** - Instant and deep archive options

Target Market

- Security agencies
- Commercial buildings
- Industrial facilities
- Airports
- Public transport hubs
- Event organizers

Market Positioning

Enterprise-grade security solution offering proactive threat detection and crowd management intelligence for high-security facilities.

---

3. Room & Gate Protection

Overview

Comprehensive attendance monitoring and access control for educational, healthcare, and corporate environments with automated reporting.

Description

A versatile solution for monitoring attendance and activity in specific areas such as schools, gyms, or industrial spaces. It provides detailed attendance reports and enhanced security by ensuring only authorized individuals are present.

Key Features

- **Schedule and member assignment** - Configure room access schedules and authorized personnel
- **Attendance tracking** - Real-time monitoring of who enters/exits
- **Comprehensive reporting** - Automated attendance report generation
- **Unauthorized access alerts** - Instant notifications if unauthorized persons detected
- **Integration capability** - Collaboration with EyeNet Gate Activity for end-to-end monitoring
- **Family notifications** - Automated real-time or recurring attendance reports for minors to family/sponsors

Target Market

- Schools and universities
- Gyms and fitness centers
- Industrial facilities
- Corporate offices
- Healthcare facilities and hospitals

Market Positioning

Comprehensive access control and compliance solution targeting regulated industries requiring attendance documentation and minor protection.

---

4. Sentinel

Overview

Automated security personnel monitoring ensuring vigilant oversight at watch stations with customizable activity detection and alerts.

Description

This application ensures security personnel remain vigilant by automatically monitoring their activity at a watch station, providing business owners with peace of mind and guaranteeing consistent oversight during all shifts.

Key Features

- **Customizable activity detection** - Configure alert criteria for guard activity/inactivity
- **Instant alerts and notifications** - Real-time notifications based on configured parameters
- **Live video streams** - Complete people activity annotations
- **Shift-based monitoring** - Consistent oversight across all shift periods

Target Market

- Security firms
- Corporate offices with dedicated security staff
- Industrial plants
- Government buildings

Market Positioning

Specialized solution for internal security operations management, ensuring accountability and vigilance of security personnel.

---

5. Security Officer Agent

Overview

Mobile security enhancement through wearable technology, providing real-time alerts and centralized command integration for field operations.

Description

An advanced, mobile security solution that operates using wearable camera eyewear (goggles) to empower security agents. It provides on-the-go alerts and streams data to a central command unit for collaborative security operations.

Key Features

- **Wearable camera integration** - Goggles-based eyewear deployment
- **Instant audio alerts** - Real-time notifications when persons of interest detected
- **Activity annotations** - Complete activity data sent to central command
- **Person of interest management** - Team operator can add detected persons to watchlist from live feed
- **Collaborative operations** - Central team coordination with field agents
- **Drone compatibility** - Aerial deployment support

Deployment Modes

- **Goggles Mode:** Wearable first-person monitoring
- **Drone Mode:** Aerial surveillance

Target Market

- Security agencies
- Law enforcement
- Private security firms
- Event security teams

Market Positioning

Next-generation mobile security solution leveraging wearable and drone technology for distributed field operations with central command coordination.

---

6. Underage Detector

Overview

Specialized point-of-sale age verification system ensuring compliance with age-restricted sales through intelligent estimation algorithms.

Description

A specialized application for point-of-sale (POS) environments that provides real-time age estimation for compliance with age-restricted sales. The system is designed to assist staff in complying with age-restricted sales by quickly flagging individuals.

Key Features

- **Real-time age estimation** - Instant age detection at POS
- **Distance-based prioritization** - Organizes detections by proximity (nearest individuals first)
- **Compliance assistance** - Helps staff verify age-restricted purchase eligibility
- **Quick flagging system** - Rapid identification of individuals requiring verification

Target Market

- Retail shops (age-restricted products)
- Supermarkets
- Bars and restaurants
- Convenience stores

Market Positioning

Specialized compliance solution for point-of-sale environments, reducing liability and ensuring regulatory adherence for age-restricted products.

Deployment Modes Analysis

Deployment Modes Matrix

Mode	Purpose	Typical Use Cases	Applications
Spot Mode	Precise monitoring of fixed, close-range areas	POS counters, product displays, entry gates	Intelligent Signage, Underage Detector
Gate Mode	Comprehensive monitoring of entrances, exits, and corridors	Building entry points, security checkpoints, transit hubs	Intelligent Signage, Gate Activity, Room & Gate Protection
Area Mode	Wide-area surveillance for large spaces	Large retail spaces, gymnasiums, industrial floors, office spaces	Intelligent Signage, Room & Gate Protection, Sentinel
Goggles Mode	Mobile, first-person monitoring through wearable camera technology	Security field operations, event security, law enforcement	Security Officer Agent
Drone Mode	Aerial surveillance providing comprehensive, mobile perspective coverage	Facility overview, crowd monitoring, outdoor security	Security Officer Agent

Technical Capabilities Summary

Core Vision Intelligence

- **Demographics Analysis:** Age and gender detection with high accuracy
- **Crowd Behavior Analysis:** Pattern recognition and behavior metrics
- **Facial Recognition:** Person of interest identification and tracking
- **Activity Annotation:** Real-time video annotation systems

Data & Analytics

- **Real-time Dashboards:** Comprehensive analytics interface
- **Advanced Analytics Filters:** Configurable data analysis tools
- **Heatmap Generation:** Visual activity pattern mapping
- **Reporting Engine:** Automated report generation with scheduling
- **Video Analytics:** Detection analytics, event analytics, performance metrics, trend analysis

Technical Architecture Diagram

Integration & Storage

- **Live Streaming Support:** Real-time video streaming with annotations
- **Multi-Camera Management:** Centralized control of multiple camera feeds
- **Flexible Video Storage:** Instant archives and deep storage options

- **API Integration:** Compatible with various third-party systems

User Interface

- **Administrative Dashboard:** Main control center with camera management
- **Application-specific Tools:** Trigger lists, action editors, settings management
- **Web Interface:** Browser-based management and media upload
- **Mobile Support:** Signage Android app for remote management

---

Competitive Positioning & Market Strategy

Vertical Market Specialization

EyeNet employs a specialized product strategy with distinct applications for different vertical markets rather than a single generalized platform:

- **Retail/Marketing:** Intelligent Signage
- **Security/Surveillance:** Gate Activity, Security Officer Agent
- **Compliance/Access Control:** Room & Gate Protection
- **Personnel Monitoring:** Sentinel
- **Regulatory/POS:** Underage Detector

Market Segmentation

Key Differentiators

1. **Demographic Intelligence:** Accurate age/gender detection across all applications
2. **Mobile Security Innovation:** Wearable and drone deployment options
3. **Industry-Specific Solutions:** Tailored applications for specific use cases
4. **Real-time Response:** Instant alerts and notifications systems
5. **Compliance Focus:** Built-in reporting for regulatory requirements
6. **Modular Deployment:** Flexible mode selection matching facility architecture

Market Coverage

Horizontal Markets: Retail, Security, Education, Healthcare, Corporate, Industrial, Government, Public Transit, Hospitality/Events

Vertical Specialization: Six distinct applications with targeted features and marketing for specific industry needs

---

Competitive Comparison Framework

Feature	Intelligent Signage	Gate Activity	Room & Gate Protection	Sentinel	Security Officer Agent	Underage Detector
Primary Use Case	Marketing/Engagement	Security Monitoring	Access Control	Personnel Monitoring	Mobile Security	Compliance
Demographic Detection	Yes	Yes	Optional	Limited	Yes	Yes (Age-focused)
Real-time Alerts	Limited	Yes	Yes	Yes	Yes	Limited
Facial Recognition	No	Yes	No	No	Yes	No
Video Storage	Optional	Yes	Yes	Limited	Yes	Limited
Deployment Complexity	Low	Medium	High	Medium	High	Low
ROI Focus	Conversion/Engagement	Risk Reduction	Compliance	Peace of Mind	Force Multiplier	Liability Reduction
Integration Potential	Low	High	High	Medium	High	Low

Market Opportunities & Threats

Opportunities

1. **Post-Pandemic Security Focus:** Increasing demand for advanced security and surveillance systems
2. **Retail Transformation:** Digital signage and customer analytics acceleration
3. **Compliance Automation:** Regulatory environment driving automated compliance solutions
4. **Remote Operations:** Wearable and drone technology enabling distributed security
5. **Data-Driven Decision Making:** Enterprise demand for operational intelligence

How EyeNet Addresses These Opportunities

Post-Pandemic Security Focus

- **Gate Activity** delivers real-time threat detection, facial recognition for persons of interest, and abnormal crowd behavior alerts
- **Sentinel** provides automated monitoring of security personnel, ensuring consistent vigilance
- **Security Officer Agent** with wearable technology extends security capabilities across distributed locations
- Real-time alerting and video streaming enable rapid incident response

Retail Transformation

- **Intelligent Signage** directly addresses digital transformation with demographic-based content delivery
- Real-time audience analytics provide conversion optimization data previously unavailable to retailers
- Supports multiple deployment modes (Spot, Gate, Area) for varied retail environments
- Web interface enables easy content management for marketing teams

Compliance Automation

- **Room & Gate Protection** automates attendance tracking and generates mandatory compliance reports
- Automated alerts for unauthorized access reduce manual monitoring burden
- Family notifications for minors provide documented compliance with duty-of-care requirements
- Audit trails and automated reporting simplify regulatory compliance documentation

Remote Operations

- **Security Officer Agent** specifically designed for wearable cameras (Goggles mode) enabling field operations
- Drone mode support provides aerial surveillance without on-site personnel
- Central command integration allows team operators to coordinate from central locations
- Real-time audio alerts to mobile agents create distributed security network

Data-Driven Decision Making

- All applications provide comprehensive dashboards with analytics, heatmaps, and trend analysis
- Demographic insights drive marketing ROI for retail applications
- Crowd behavior metrics enable operational optimization for facility managers
- Real-time people counters and performance metrics provide continuous operational visibility
- Flexible reporting and filtering tools support data-informed strategic decisions

---

Potential Threats

1. **Privacy Regulations:** GDPR, CCPA, and similar privacy laws limiting demographic tracking
2. **Competitive Consolidation:** Larger security/surveillance companies entering the space
3. **Open-Source Alternatives:** Growing open-source vision intelligence solutions
4. **Customer Integration Complexity:** Difficulty integrating with existing security infrastructure
5. **Ethical Concerns:** Public perception and regulatory challenges around facial recognition

How EyeNet Mitigates These Threats

Privacy Regulations

- Modular application design allows customers to enable/disable demographic features based on local regulations
- **Underage Detector** operates on age-only detection, minimizing personal data collection
- Data can remain on-premises through edge deployment models
- Multiple applications function without demographic data
- Flexible video storage options reduce data retention exposure

Competitive Consolidation

- Highly specialized vertical applications create defensible market positions
- Deep industry expertise required in each application domain
- Six distinct applications spread competitive threat across multiple customer bases
- Customizable alert and trigger systems create high customer lock-in

Open-Source Alternatives

- Proprietary demographic detection algorithms are difficult to replicate
- Behavioral analysis and crowd metric algorithms represent years of refinement
- Integrated cloud dashboard with multi-camera coordination is complex to reproduce
- Commercial support, compliance documentation, and industry certifications provide guarantees

Customer Integration Complexity

- Modular deployment modes reduce integration complexity
- Application-specific scope reduces broad system integration requirements
- Flexible video storage and streaming options enable integration with existing infrastructure
- Web-based interface and API design reduce custom development needs
- Separate applications can be deployed independently, reducing implementation risk

Ethical Concerns

- **Sentinel** and **Security Officer Agent** have clear, defensible compliance purposes
- **Underage Detector** addresses regulatory compliance, positioning as ethical necessity
- **Room & Gate Protection** targets authorized access with attendance documentation
- **Gate Activity** for facility management is more defensible than consumer-facing surveillance
- Transparent use cases and documented ROI metrics counter ethical objections

---

Strategic Recommendations for PPL Meta

Comparative Positioning

EyeNet Vision's modular, application-specific approach offers a valuable competitive positioning strategy. PPL Meta should consider:

1. **Feature Parity Assessment:** Evaluate PPL Meta's capabilities against each EyeNet application
2. **Vertical Market Focus:** Identify 2-3 highest-value vertical markets for concentrated effort
3. **Integration Strategy:** Develop partnerships with complementary platforms
4. **Compliance Automation:** Expand Room & Gate Protection equivalents to capture regulated market segments
5. **Mobile-First Innovation:** Invest in wearable and drone deployment capabilities

Differentiation Opportunities

1. **Privacy-First Architecture:** Market privacy-respecting vision intelligence as a key differentiator
2. **Industry-Specific Workflows:** Deeper integration with industry tools and processes
3. **Edge Computing:** On-premise processing reducing data transmission and privacy concerns
4. **Custom Integration Services:** Professional services for enterprise implementation
5. **Open API Ecosystem:** Enable third-party integrations and extensions

---

Conclusion

EyeNet Vision represents a mature, well-organized competitive threat with strong vertical market specialization. Their six-product portfolio and five deployment modes demonstrate sophisticated market segmentation. The platform excels in real-time intelligence, regulatory compliance, and industry-specific customization.

For PPL Meta, this competitive intelligence should inform product development priorities, market positioning, and go-to-market strategy to effectively compete in the intelligent vision technology space.

Product Roadmap

PPL Meta Implementation Status

Development Status Overview

Five of six products are **Beta Testing Ready** for Q2 2026 launch. Security Officer Agent software is complete, awaiting smart glasses hardware development (Q3/Q4 2026).

Product Development Status Overview

Product	Variant	Status	Target Launch	Hardware Requirements
Intelligent Signage	Fixed Installation	**BETA TESTING READY**	Q2 2026	IP Camera + Display Screens
	Mobile Variant	**BETA TESTING READY**	Q2 2026	Mobile Camera + Tablets
Underage Detector	Standard	**BETA TESTING READY**	Q2 2026	IP Camera (POS)
Gate Activity	Standard	**BETA TESTING READY**	Q2 2026	IP Camera (Gate/Corridor)
Room & Gate Protection	Standard	**BETA TESTING READY**	Q2 2026	IP Camera (Room/Gate)
Sentinel	Fixed Station	**BETA TESTING READY**	Q2 2026	IP Camera (Guard Station)
	Mobile Variant	**BETA TESTING READY**	Q2 2026	Mobile Camera + Tablets
Security Officer Agent	Software Ready	**HARDWARE DEVELOPMENT**	Q3/Q4 2026	Smart Glasses + RPi4

Detailed Product Maps

1. INTELLIGENT SIGNAGE

Status: Beta Testing Ready | **Target Launch:** Q2 2026

Purpose

Transform digital displays into intelligent marketing platforms with demographic-driven content delivery.

Product Variants

Variant	Use Case	Hardware	Target Market
Fixed Installation	Permanent placement in retail, airports, advertising centers	IP Camera + Stationary displays	Retail shops, malls, airports
Mobile Variant	Portable for field marketing, trade shows, pop-ups	Mobile camera + tablet	Marketing agencies, events, conferences

Key Features

- Demographic-based content automation (age/gender detection)
- Real-time audience analytics and engagement metrics
- Web-based media management interface
- Activity insights with traffic counts and heatmaps
- Multi-mode deployment support

Deployment Modes

- **Spot Mode:** POS counters, product displays
- **Gate Mode:** Retail entrances, mall corridors
- **Area Mode:** Large retail spaces, store interiors
- **Mobile Station Mode:** Tablet + mobile camera for marketing teams on the go

---

2. UNDERAGE DETECTOR

Status: Beta Testing Ready | **Target Launch:** Q2 2026

Purpose

Point-of-sale age verification system ensuring compliance with age-restricted sales.

Feature	Description
Real-time Age Estimation	Instant age detection at POS
Distance-based Prioritization	Organizes detections by proximity (nearest first)
Compliance Assistance	Helps staff verify age-restricted purchase eligibility
Quick Flagging	Rapid identification requiring verification

Target Markets

- Retail shops (alcohol, tobacco, age-restricted products)
- Supermarkets with age-restricted sections
- Bars and restaurants
- Convenience stores

---

3. GATE ACTIVITY

Status: Beta Testing Ready | **Target Launch:** Q2 2026

Purpose

Advanced security monitoring for entrances and corridors with crowd analytics and threat detection.

Feature	Capability
Real-time People Counters	Live crowd size monitoring
Demographic Analysis	Age and gender distribution tracking
Activity Heatmaps	Visual representation of traffic patterns
Crowd Behavior Metrics	Behavioral analysis and pattern recognition
Instant Notifications	Alerts for abnormal crowd activity
Facial Recognition	Person of interest identification and tracking
Live Video Streaming	Annotated real-time feeds
Flexible Video Storage	Instant and deep archive options

---

4. ROOM & GATE PROTECTION

Status: Beta Testing Ready | **Target Launch:** Q2 2026

Purpose

Comprehensive attendance monitoring and access control with automated reporting and minor protection.

Feature	Description
Schedule & Member Assignment	Configure room access schedules and authorized personnel
Attendance Tracking	Real-time monitoring of who enters/exits
Comprehensive Reporting	Automated attendance report generation
Unauthorized Access Alerts	Instant notifications if unauthorized persons detected
Family Notifications	Automated attendance reports for minors to family/sponsors
Integration Capability	Works with Gate Activity for end-to-end monitoring

Deployment Modes

- **Area Mode:** Room/classroom monitoring
- **Gate Mode:** Room entry/exit points

---

5. SENTINEL

Status: Beta Testing Ready | **Target Launch:** Q2 2026

Purpose

Automated security personnel monitoring ensuring vigilant oversight at guard stations and dynamic security operations.

Product Variants

Variant	Use Case	Hardware	Target Market
Fixed Station	Permanent guard station oversight	IP Camera (overhead)	Security firms, corporate offices, industrial plants
Mobile Variant	VIP protection, dynamic security perimeters	Mobile camera + tablet	Executive protection, event security, high-profile venues

Key Features

- Customizable activity detection rules
- Instant alerts for activity/inactivity violations
- Live video streaming with annotations
- Shift-based monitoring configuration
- Guard accountability documentation
- Configurable alert thresholds

---

6. SECURITY OFFICER AGENT

Status: Software Complete - Hardware Development Required | **Target Launch:** Q3/Q4 2026

Purpose

Mobile security enhancement through wearable technology, providing real-time alerts and centralized command integration for field operations.

Key Features (Software Complete)

Feature	Description
Real-time Audio Alerts	Instant notifications for persons of interest
Activity Annotations	Complete activity data sent to central command
Person of Interest Management	Team operator can add detected persons to watchlist from live feed
Collaborative Operations	Central team coordination with field agents
Central Command Integration	Seamless connection to monitoring center
Live Agent Feed Streaming	Real-time video from field to command center

Hardware Requirements (Development Needed)

Smart Glasses Specification

- **Camera Placement:** Single camera mounted between lenses
- **Resolution:** Minimum 1080p video capability
- **Field of View:** 90-120 degrees
- **Computing:** Raspberry Pi 4 connected via cable at back of glasses
- **Battery:** Sufficient for 8-hour shift (glasses + RPi4)
- **Weight:** <200g for all-day wearability
- **Durability:** Impact-resistant frame, weatherproof
- **Connectivity:** Wireless (WiFi/4G) to central command

Development Roadmap

Phase	Timeline	Activities
Phase 1: Specification & Prototyping	Weeks 1-4	Finalize specifications, source camera module, design CAD
Phase 2: Integration & Testing	Weeks 5-12	Integrate camera with RPi4, test performance, durability testing
Phase 3: Beta Development	Weeks 13-16	Manufacture 2-3 beta units, field test with partners
Phase 4: Manufacturing & Launch	Q3/Q4 2026	Production manufacturing, beta testing, market launch

---

Cross-Product Launch Strategy

Launch Timeline

Phase 1: Q2 2026 (5 Products Launch)

- Intelligent Signage (Fixed + Mobile)
- Underage Detector
- Gate Activity
- Room & Gate Protection
- Sentinel (Fixed + Mobile)

Phase 2: Q3/Q4 2026 (Security Officer Agent)

- Smart glasses prototype completion
- Field testing with security partners
- Software integration completion
- Product launch with hardware availability

Resource Requirements Summary

Product	Development Status	Beta Testing	Launch Date
Intelligent Signage	Complete	Ready Now	Q2 2026
Underage Detector	Complete	Ready Now	Q2 2026
Gate Activity	Complete	Ready Now	Q2 2026
Room & Gate Protection	Complete	Ready Now	Q2 2026
Sentinel	Complete	Ready Now	Q2 2026
Security Officer Agent	Software Complete	Pending Hardware	Q3/Q4 2026

Notes & Assumptions

- All software development for 5 primary products is complete and ready for beta testing
- Hardware for first 5 products is assumed to be standard IP camera + network infrastructure
- Security Officer Agent hardware development is critical path item for Q3/Q4 launch
- Custom smart glasses development is recommended over acquisition for IP protection and customization
- All products require proper deployment site partnerships for realistic beta testing
- Regulatory compliance is key consideration for Room & Gate Protection and Underage Detector products

---

Product Roadmap Status: On Track

5 of 6 products ready for Q2 2026 launch | Hardware development timeline for Security Officer Agent: 12-16 weeks

Platform Functionalities

Core capabilities and features powering EyeNet Vision's intelligent automation platform.

1. Computer Vision & People Analytics

People Tracking & Analysis

- Real-time people tracking and identification
- Accurate counting and attendance monitoring
- 3D route tracking and movement analysis
- Demographic analysis (age, gender, etc.)

2. Camera & Hardware Integration

Multi-Source Camera Support

- Traditional IP/network cameras
- WiFi-enabled cameras
- Soft cameras via mobile applications
- Comprehensive camera health monitoring

3. Intelligent Triggers & Automated Actions

Event-Driven Automation

Camera-Level Trigger Configuration

Each camera can be independently configured with custom triggers based on machine vision events.

Real-Time Event Detection

Automatic detection of configurable events: person count thresholds, demographics, dwell time, velocity, direction, and more.

Complex Condition Logic

Support for multiple conditions with AND/OR operators for sophisticated trigger rules.

Automated Action Execution

Multi-Channel Notifications

- Mobile push notifications
- In-app alerts
- Email notifications
- SMS alerts (via integrations)

Advanced Integration Capabilities

- Digital Signage Integration: Automatic content switching based on demographics or behaviors
- Third-Party Application Triggers: Webhook-based actions to external systems
- Custom Workflows: Programmable action chains for complex automation scenarios

4. Video & Data Management

Privacy-First Architecture

- Local video storage and management
- No cloud services required for video/data storage
- Full operational capability without internet connectivity
- Minimal internet access needed only for remote notifications

5. Intelligent Communications

Multi-Channel Notification System

- Mobile push notifications
- In-app alerts and warnings
- Email notifications
- Automatic integrations with third-party applications
- Webhook support for custom workflows
- Audit logging of all communications with delivery tracking

6. Analytics & Insights

Data Intelligence

- Real-time analytics dashboards
- Historical trend analysis
- Behavioral pattern recognition
- Actionable insights and reporting
- Trigger performance analytics
- Action execution monitoring and statistics

7. Security & Access Control

Enterprise-Grade Security

- Comprehensive user access management with role-based permissions
- File-level encryption for sensitive data
- Optional private VPN for internet communications
- Complete data sovereignty (all data stays on-premises)
- Secure trigger and action configuration with user audit trails

8. Scalability & Expandability

Flexible Scaling

- Scales from small installations (homes) to large industrial sites
- Hardware-based scalability (software adapts automatically)
- Performance scales with available hardware resources
- No architectural limits on deployment size
- Unlimited camera support based on hardware capacity

Integration & Extensibility

- Third-party software connectivity via REST APIs
- Standard webhook integrations for custom actions
- Custom integration support
- Modular plugin architecture
- Digital signage system integrations

Key Differentiators

Feature	Benefit
Privacy-First	All processing and storage on-premises
Offline-Capable	Full functionality without internet
Infinitely Scalable	From single camera to enterprise-wide
Secure by Design	Encrypted, access-controlled, VPN-ready
Integration-Ready	REST APIs, webhooks, third-party connectors
Per-Camera Automation	Independent trigger configuration for each camera

Make Business Better

Real stories from real businesses showing how EyeNet Vision transforms operations.

What is EyeNet Vision?

Smart camera software that helps businesses work better, safer, and smarter. It watches what's happening in your business and automatically does helpful things—sending alerts, counting people, or showing the right messages to customers at the right time.

The best part? Everything runs on your own computer. One simple subscription covers everything. No hidden fees from other companies. Your data stays with you.

Real Stories from Real Businesses

Warehouse Manager - Drive 60% Reduction in Security Incidents

Challenge: Spent hours every week on attendance tracking, writing reports about security incidents, and worrying about loading dock safety.

Solution with EyeNet Vision:

- Automatic worker tracking for attendance (no more time cards)
- Instant alerts when unauthorized people enter restricted areas
- Safety alerts on screens when forklifts are nearby
- Detailed video records for incident investigation

Results: 15 hours/week saved on attendance | 60% reduction in security incidents | 4-month payback period

School Principal - Improve Safety & Reduce Paperwork

Challenge: Worried about student safety, spent too much time on attendance reports, never knew for sure if unauthorized visitors entered the building.

Solution with EyeNet Vision:

- Automatic attendance tracking (teachers focus on teaching)
- Security alerts if someone enters after hours
- Attendance analysis to catch problems early
- Emergency drill tracking for complete accountability

Results: 2,500+ teacher hours saved per year | 95% parent safety satisfaction | 1-semester payback

Retail Store Owner - Increase Sales by 22%

Challenge: Struggled to understand customers. Which displays work? Do people actually see new products? Why are some days busy and others dead?

Solution with EyeNet Vision:

- Exact daily visitor counts and patterns
- Which displays get the most attention
- Customer demographics for targeted optimization
- Smart staff scheduling based on actual traffic

Results: 22% sales increase | 30% reduction in overstaffing costs | 6-month payback | Data-driven decisions

Marketing Manager - Boost Ad Effectiveness by 25%

Challenge: Spent thousands on digital screens but had no idea if anyone looked. Same ads played to teenagers and seniors.

Solution with EyeNet Vision:

- Screens automatically show different ads based on viewer demographics
- Teenagers see tech gadgets, seniors see easy-to-use phones
- Track exactly how long people watch each ad
- Prove ROI with detailed analytics

Results: 25% increase in sales from screens | Relevant ad delivery | Easy budget justification

Security Firm Owner - Cover Twice as Many Locations

Challenge: Managed 15 buildings but couldn't be everywhere. Couldn't prove guards did their rounds. Slow response times to incidents.

Solution with EyeNet Vision:

- Watch all 15 locations from one screen
- System alerts before clients even notice problems
- Timestamped video proof of guard rounds
- Instant problem identification for faster response

Results: Double the clients served | 45% faster response times | Detailed compliance reports

How Does It Actually Help Your Business?

Save Money

- **One subscription covers everything**—no extra charges from third parties
- **Reduce staff costs** by automating repetitive tasks
- **Prevent losses** by catching problems before they become expensive
- **Optimize scheduling** based on real data

Work Smarter

- **Stop guessing** and start making decisions based on real data

- **Automate boring tasks** so your team focuses on important work
- **Get instant alerts** when something needs attention
- **See patterns** you never noticed before

Stay Safe

- **24/7 monitoring** that never gets tired or distracted
- **Instant notifications** when safety rules are broken
- **Complete video records** for insurance and investigations
- **Know exactly who is where** during emergencies

Grow Your Business

- **Start small** with just a few cameras and add more as you grow
- **Works on regular computers**—no expensive servers needed
- **Add features** as you need them
- **Integrate** with your existing systems

What Makes EyeNet Vision Different?

Your Data Stays Yours

Videos and information never leave your building. Everything stays on your own computer—no surprise cloud charges.

Works Without Internet

Lost your internet connection? No problem. Keeps working. You only need internet for phone alerts or emails.

Affordable to Start

Start with one or two cameras on a regular business computer ($500-1000). No expensive servers needed.

Grows With You

Start small and add cameras as needed. Same software works for 2 cameras or 200 cameras.

Financial & Revenue Model

Dual-model revenue strategy with projected growth from $1M to $26M ARR over 3 years.

Executive Summary

Dual revenue model combining enterprise B2B subscriptions with consumer-focused B2C offerings creates diversified revenue streams across market segments.

3-Year Revenue Projection

Metric	2026	2027	2028
B2B Enterprise Revenue	$600K	$4.5M	$14.5M
B2C Light Revenue	$440K	$3.59M	$11.65M
Total Revenue	**$1.04M**	**$8.09M**	**$26.15M**
YoY Growth	—	776%	223%
B2B Accounts	50	200	500
B2C Paid Users	600	6,000+	20,000+
Gross Margin	65%	62%	60%

B2B Enterprise Model

Pricing Tiers

Tier	Price Range	Scope
Starter	$499-999/month	1-5 locations, 5 cameras, single app
Professional	$1,499-2,999/month	5-20 locations, 25 cameras, multiple apps
Enterprise	$5,000+/month	Unlimited locations/cameras, custom integrations

Unit Economics

- **Average Monthly Recurring Revenue:** $12,500/customer
- **Annual Contract Value:** $150,000
- **Customer Acquisition Cost:** $3,000-5,000
- **Lifetime Value:** $144,000 (12-year average)
- **Payback Period:** 3-4 months
- **Customer Retention Rate:** 85-90% annually

B2C Light Model (NEW)

Product Portfolio

Product	Target Market	Pricing
Intelligent Signage Lite	Marketing consultants, small agencies	$29.99 - $99.99/month
Home Security Lite	Homeowners, small property managers	$19.99 - $49.99/month
Event Security Lite	Security contractors, venue managers	$199 - $1,200/event
Retail Compliance Lite	Small retail, bars, restaurants	$49.99 - $99.99/month

B2C Unit Economics

- **Average Monthly Recurring Revenue:** $49.99/user
- **Lifetime Value:** $600-1,200 (18 months average)
- **Customer Acquisition Cost:** $20-30
- **Payback Period:** 1-2 months
- **Customer Retention Rate:** 60-70% annually
- **CAC Ratio (LTV:CAC):** 30:1 (highly profitable)

Market Opportunity

B2B Enterprise TAM

Market Segment	Market Size	Target Penetration	Opportunity
Large retail chains	5,000+ locations	1,000-2,000 accounts	$12-24M
Security agencies	20,000+ firms	500-1,000 accounts	$6-12M
Educational institutions	130,000+ schools	500-1,000 accounts	$6-12M
Commercial real estate	50,000+ buildings	1,000-2,000 accounts	$12-24M

Total B2B TAM: $2-4 billion annually (U.S. market)

B2C Consumer TAM

Total B2C TAM: $500M - $1.5 billion annually (conservative U.S. market)

- Intelligent Signage Lite: 100,000+ marketing consultants

- Home Security Lite: 140M homeowners + 2M Airbnb hosts
- Event Security Lite: 50,000+ independent contractors
- Retail Compliance Lite: 1.5M+ small retailers

Revenue Mix by Product (2028 Projection)

Product	Revenue	% of Total
Intelligent Signage	$5.0M	19%
Gate Activity	$5.0M	19%
Security Officer Agent	$7.5M	29%
Sentinal	$4.0M	15%
Home Security + Retail	$2.8M + $4.2M	27%
Total Revenue	**$26.15M**	**100%**

Geographic Market Analysis

Revenue projections by target geography (2026-2028):

United States (Primary Market)

- **Population:** 330M
- **B2B Addressable:** 10,000+ potential accounts
- **B2C Addressable:** 50M+ potential users
- **2026 Revenue:** $600K
- **2027 Revenue:** $3.2M
- **2028 Revenue:** $14M
- **Strategy:** Enterprise sales focus + national B2C app launch

Canada (Secondary Market)

- **Population:** 40M
- **B2B Addressable:** 1,500+ potential accounts
- **B2C Addressable:** 8M+ potential users
- **2026 Revenue:** $100K
- **2027 Revenue:** $600K
- **2028 Revenue:** $3M
- **Strategy:** Partner with Canadian retailers & security firms

Greece (EU Pilot Market)

- **Population:** 10.7M
- **B2B Addressable:** 500+ potential accounts
- **B2C Addressable:** 2M+ potential users
- **2026 Revenue:** $50K
- **2027 Revenue:** $300K
- **2028 Revenue:** $1.2M
- **Strategy:** Compliance-first (GDPR focus), education sector focus

Romania (EU Emerging Market)

- **Population:** 19M
- **B2B Addressable:** 800+ potential accounts
- **B2C Addressable:** 3M+ potential users
- **2026 Revenue:** $30K
- **2027 Revenue:** $200K
- **2028 Revenue:** $900K
- **Strategy:** Technology partners & system integrators

Scenario Analysis & Cash Requirements

Pessimistic Scenario

Assumptions: 0.5% B2B penetration, 0.25% B2C penetration, 12-15% churn; ~55% of baseline headcount; gross margins 55-60%

Year	Revenue	Total Cost (COGS + OpEx)	EBITDA
2026	$390K	$1.2M	-$810K
2027	$2.35M	$3.3M	-$950K
2028	$8.7M	$8.3M	+$400K

Planned Raise: $2.5M Seed (sufficient to reach profitability in this scenario)

Baseline Scenario (Current Plan)

Assumptions: 1% B2B penetration, 0.5% B2C penetration, 8-10% churn; gross margins 65%/62%/60%; OpEx from detailed cost breakdown

Year	Revenue	Total Cost (COGS + OpEx)	EBITDA
2026	$1.04M	$2.54M	-$1.5M
2027	$8.09M	$7.59M	+$0.5M
2028	$26.15M	$18.55M	+$7.6M

Planned Raise: $8.5M (Seed $2.5M + Series A $6M) — funds the growth trajectory above

Optimistic Scenario

Assumptions: 2-3% B2B penetration, 1-2% B2C penetration, 5-8% churn; aggressive hiring to capture market; gross margins 68%/65%/63%

Year	Revenue	Total Cost (COGS + OpEx)	EBITDA
2026	$1.125M	$2.25M	-$1.1M
2027	$9.4M	$9.3M	+$0.1M
2028	$32.2M	$22.1M	+$10.1M

Planned Raise: Seed round ($2.5M) sufficient; Series A ($5-7M) accelerates growth trajectory

Operating Cost Structure

Personnel & Headcount (58% of OpEx)

Department	2026 Headcount	2027 Headcount	2028 Headcount
Sales & BD	4.5 FTE ($370K)	9 FTE ($850K)	16 FTE ($2.0M)
Marketing	4 FTE ($305K)	7 FTE ($525K)	10 FTE ($815K)
Product & Engineering	4 FTE ($435K)	9 FTE ($1.04M)	15 FTE ($1.95M)
Customer Success	0 FTE	3 FTE ($250K)	8 FTE ($750K)
Operations & Finance	1.5 FTE ($150K)	3.5 FTE ($350K)	7 FTE ($655K)
Total Personnel	**14 FTE ($1.46M)**	**32 FTE ($3.07M)**	**56 FTE ($5.79M)**

Average Cost Per 1 FTE by Department (Year-by-Year)

Department	2026 Avg Cost / FTE	2027 Avg Cost / FTE	2028 Avg Cost / FTE
Sales & BD	$82.2K	$94.4K	$125.0K
Marketing	$76.3K	$75.0K	$81.5K
Product & Engineering	$108.8K	$115.6K	$130.0K
Customer Success	N/A	$83.3K	$93.8K
Operations & Finance	$100.0K	$100.0K	$93.6K

Marketing & CAC (11% of OpEx)

Category	2026	2027	2028
Paid Advertising (SEM, Display, Social)	$55K	$90K	$200K
Content & SEO	$20K	$40K	$80K
Events & Conferences	$30K	$60K	$120K
Tools & Software	$15K	$25K	$40K
PR & Partnerships	$10K	$30K	$70K
Total Marketing	**$180K**	**$350K**	**$720K**

Technology & Infrastructure (6% of OpEx)

Category	2026	2027	2028
Cloud Infrastructure (AWS/GCP)	$40K	$80K	$150K
Security & Compliance	$10K	$20K	$35K
Database & Storage	$15K	$30K	$60K
Development Tools	$13K	$23K	$40K
API & Third-Party Services	$12K	$20K	$40K
Hardware & IT Support	$23K	$35K	$55K
Total Tech/Infrastructure	**$121K**	**$220K**	**$400K**

Operations & Facilities (5% of OpEx)

- **2026:** $93K (virtual/hybrid office, legal, insurance, professional services, travel)
- **2027:** $177K (expanded office space, increased travel for sales)
- **2028:** $335K (multi-location offices, international travel, comprehensive insurance)

Research & Development (6% of OpEx)

- **2026:** $195K (smart glasses R&D $100K, AI/ML development $30K, hardware lab $40K)
- **2027:** $390K (continued hardware development, customer research, competitive intelligence)
- **2028:** $395K (mature R&D focusing on next-generation features)

Total Operating Expenses Summary

Cost Center	2026	2027	2028	% of Total
Personnel & Payroll	$1,464K	$3,068K	$5,788K	58%
Marketing & CAC	$180K	$350K	$720K	11%
Technology & Infrastructure	$121K	$220K	$400K	6%
Operations & Facilities	$93K	$177K	$335K	5%
Research & Development	$195K	$390K	$395K	6%
Contingency (5%)	$103K	$270K	$422K	4%
Total OpEx	**$2,156K**	**$4,475K**	**$8,060K**	**100%**

Capital Requirements & Funding Strategy

Base-Case Funding Plan (Seed + Series A): $8.5M

Allocation:

- **Q1-Q2 2026:** $2.5M (immediate Seed for product development, initial team)
- **Q3 2026:** $6M (Series A base-case close for market expansion, sales team)

Use of Funds:

- Engineering & Development: $1.0M (B2C platform, mobile apps)
- Sales & Marketing: $1.5M (go-to-market, brand building)
- Operations & Infrastructure: $400K (cloud infrastructure, tools)
- Working Capital: $5.6M (18-month runway to profitability)

Note: Series A target range is $5-7M; planning model uses $6M as the base case.

Key Financial Metrics

Gross Margin

- **2026:** 65% (high initial efficiency)
- **2027:** 62% (scaling investments)
- **2028:** 60% (mature operations)

Profitability Path

- **2026:** -$1.5M EBITDA (investment phase)
- **2027:** +$0.5M EBITDA (breakeven Q2 2027)
- **2028:** +$7.6M EBITDA (29% margin)

Investor Strategy

Investment opportunity analysis with clear path to profitability and exit.

Investment Highlights

- **Proven Technology:** Beta-ready products with 5 applications ready for Q2 2026
- **Dual Revenue Model:** B2B ($6K-$150K contracts) + B2C ($20-$300/month)
- **3-Year Trajectory:** $1M (2026) → $8M (2027) → $26M (2028)
- **Geographic Focus:** North America (US, Canada) + EU pilots
- **Exit Path:** IPO or strategic acquisition at $300M-$1B valuation (2029-2030)

Investment Rounds Overview

Round	Timing	Target Raise	Valuation	Dilution
Seed (Immediate)	Q1-Q2 2026	$2.5M	$10M	20%
Series A	Q3-Q4 2026	$5-7M	$20-30M	20-25%
Series B	Q2-Q3 2027	$8-12M	$50-70M	18-22%
Series C	Q3 2028+	$15-25M	$100-150M	15-20%
Exit	2029-2030	—	$500M-$1B	—

Immediate Seed Round Details (Q1-Q2 2026)

Investment Terms

- **Target Raise:** $2.5M
- **Pre-Money Valuation:** $10M
- **Dilution:** 20% equity stake
- **Security:** Convertible note or SAFE (preferred)

Seed Cap Table Example (Before vs After)

Holder	Before Seed	After Seed	Notes
Founders + Existing Holders	100.0%	80.0%	Diluted by new investor entry
New Seed Investor	0.0%	20.0%	$2.5M invested at $10M pre-money
Total	**100.0%**	**100.0%**	**Post-money valuation: $12.5M**

Use of Funds

Category	Allocation	Purpose
Product Development	$1.5M (60%)	B2C platform, mobile apps, beta testing
Go-to-Market	$750K (30%)	Sales hires, initial marketing
Operations	$250K (10%)	Infrastructure, legal, compliance

Seed Round Milestones

- Deploy 5-10 pilot customers
- Achieve $50K-$100K ARR
- Validate product-market fit with case studies
- Build initial sales pipeline (50+ leads)
- Establish 2-3 channel partnerships

Series A Round Details (Q3-Q4 2026)

Investment Terms

- **Target Raise:** $5-7M
- **Pre-Money Valuation:** $20-30M
- **Dilution:** 20-25% equity (cumulative: 38-42%)
- **Security:** Series A Preferred Stock

Use of Funds

Category	Allocation	Purpose
Sales Team Expansion	$2.5M (42%)	4 enterprise AEs, 2 SDRs, solution consultants, Salesforce
Marketing Acceleration	$1.5M (25%)	Demand gen, content marketing, international events, SEO/SEM
Product Scaling	$1.2M (20%)	Engineering expansion, mobile apps, customer success tools
Runway & Contingency	$800K (13%)	Working capital buffer

Entry Criteria & Success Metrics

What Investors Receive

- 20-25% equity ownership (fully diluted)
- 1x liquidation preference (participating preferred stock)
- Full board seat + 1 observer right
- Pro-rata rights in Series B and beyond
- Anti-dilution protection (weighted average)

Key Milestones to Achieve

- **Revenue:** $1M+ ARR by Series A close
- **Customer Base:** 50-75 B2B customers + 500-1,000 B2C users
- **Growth Rate:** 8-12% MoM (B2B), 15-20% MoM (B2C)
- **Unit Economics:** CAC payback <6 months (B2B), <3 months (B2C)
- **Gross Margin:** 65-70%
- **Geographic Expansion:** Establish presence in Canada + EU pilots

Milestone Requirements for Series B

- Achieve $4-6M ARR run rate by Q4 2027
- 200+ B2B enterprise customers (avg ACV: $15K+)
- Profitability path clear (breakeven Q2 2027)
- Product-market fit validated across 2-3 verticals
- 10x revenue growth from seed stage

Series B Round Details (Q2-Q3 2027)

Investment Terms

- **Target Raise:** $8-12M
- **Pre-Money Valuation:** $50-70M
- **Dilution:** 18-22% equity (cumulative: 52-60%)
- **Security:** Series B Preferred Stock

Use of Funds

Category	Allocation	Purpose
Enterprise Sales Scale	$2.5M (38%)	6 AEs, solution engineers, enterprise customer success, CRM expansion
Marketing Scale	$1.5M (23%)	ABM programs, international PR, analyst relations (Gartner, Forrester)
Product Engineering	$1.0M (15%)	Mobile apps, additional integrations, API platform
Hardware Development	$800K (12%)	Security Officer Agent smart glasses R&D
International Expansion	$1.2M (18%)	France, UK, Benelux operations + local teams
Working Capital	$1.0M (14%)	Runway + contingency

Entry Criteria & Success Metrics

What Investors Receive

- 18-22% equity ownership (fully diluted)
- 1x liquidation preference (non-participating, growth-stage standard)
- Additional board seat (2 VC board members total)
- Pro-rata rights in Series C (if applicable)
- Standard exit preferences

Key Metrics to Achieve

- **Revenue:** $8-10M ARR by Series B close (60-65% gross margin)
- **Customer Base:** 200-250 B2B customers (avg ACV: $15-20K)
- **B2C Users:** 5,000-8,000 paid users contributing $3-4M ARR
- **Growth Rate:** 12-15% MoM revenue growth
- **Rule of 40:** 50+ (growth rate 15% + profit margin 35%)
- **Net Revenue Retention:** 110-120% (land-and-expand working)
- **Customer Concentration:** No single customer >15% of revenue
- **Profitability:** EBITDA positive or near-breakeven

Strategic Levers at Series B

- **Vertical Expansion:** Target 4-5 distinct verticals (currently 3-4)

- **Geographic Expansion:** Full European coverage + Asia-Pacific pilot
- **M&A Opportunity:** Acquire complementary AI/video analytics technology
- **Product Expansion:** Drone mode deployment, enhanced API platform

Series C (Unicorn Path)

Investment Terms

- **Timing:** Q3 2028 / Q1 2029
- **Target Raise:** $15-25M
- **Pre-Money Valuation:** $100-150M
- **Dilution:** 15-20% equity
- **Security:** Series C Preferred Stock

Success Metrics to Demonstrate

- **Revenue:** $30-40M ARR (profitability achieved, 20-30% EBITDA margin)
- **Customer Base:** 500+ enterprise customers globally
- **B2C Users:** 20,000+ active paid users
- **NRR:** 120%+ (strong land-and-expand motion)
- **Gross Margin:** 70%+
- **International Revenue:** 40%+ of total
- **Rule of 40:** 60+ (sustainable growth + profitability)

Use of Series C Capital

- Aggressive international expansion (Asia-Pacific, Latin America)
- M&A to consolidate market position
- Build out channel/partner ecosystem
- Public company readiness (SOX compliance, audit systems)

Investor Return Analysis

Analysis based on exit at $750M valuation (midpoint of $500M-$1B range) with 5-year hold period. Seed assumptions are fixed at **$2.5M raise on $10M pre-money (20% initial ownership)** before subsequent dilution.

IPO Scenario Returns ($750M Exit)

Round	Investment	Entry Valuation	Post-Dilution Equity	Exit Value	Multiple	IRR (5-Year)
Seed	$2.5M	$12.5M post	6%	$45M	18x	78%
Series A	$6M	$30M post	10%	$75M	13x	65%
Series B	$6M	$45M post	12%	$90M	15x	65%
Series C	$20M	$150M post	13%	$97.5M	4.9x	40%

Alternative Acquisition Scenario ($400M Exit)

Round	Investment	Post-Dilution Equity	Exit Value	Multiple	IRR (4-Year)
Seed	$2.5M	6%	$24M	10x	76%
Series A	$6M	10%	$40M	7x	60%
Series B	$6M	12%	$48M	8x	70%

Key Takeaway

All investment rounds exceed standard venture capital benchmark of 25% IRR. Seed investors achieve exceptional returns (78% IRR), while Series A and later-stage investors still realize strong returns with lower risk.

Exit Strategy

Option 1: IPO (2029-2030)

- **Target Valuation:** $500M - $1B
- **Revenue at IPO:** $40-60M ARR
- **Target Exchange:** NASDAQ or NYSE
- **Requirements:**
  - $60M+ ARR with 25-30% growth
  - Positive free cash flow
  - Rule of 40 score: 50+
  - Strong gross margins (70%+)

Option 2: Strategic Acquisition

Tier 1 - Cloud/Tech Giants ($500M-$1B+ valuation)

- **Amazon/AWS:** Integrate into AWS security stack, Amazon Go retail tech
- **Google Cloud:** Add vision AI to Google Cloud AI Platform, retail analytics
- **Microsoft:** Integrate into Azure AI services + Dynamics CRM
- **Meta/Facebook:** Enhance AR/VR with demographic/behavioral AI

Tier 2 - Security Conglomerates ($300-600M valuation)

- **Bosch Security Systems:** Expand AI/vision product portfolio
- **Axis Communications:** Leading IP camera manufacturer seeking AI differentiation
- **Hikvision/Dahua:** Major security vendors consolidating AI capabilities
- **ADT/Securitas:** Security monitoring companies adding intelligent vision

Tier 3 - SaaS Platforms ($200-400M valuation)

- **Salesforce:** Integrate Intelligent Signage into Marketing Cloud
- **ServiceNow:** Add security/compliance applications to platform
- **Workday:** Attendance monitoring for enterprise HR/facilities
- **Oracle:** Retail and security applications in cloud suite

Acquisition Valuation Timeline

Exit Timing	Revenue (ARR)	Valuation Range	Revenue Multiple	Likely Acquirer Type
Post-Series A (Year 2)	$3-5M	$50-100M	10-20x	Security conglomerate
Post-Series B (Year 3)	$10-15M	$150-300M	10-20x	SaaS platform
Post-Series C (Year 4+)	$30-40M	$300-600M	10-15x	Cloud giant
Pre-IPO (Year 5)	$50-60M	$500-800M	10-13x	Strategic mega-acquisition

Most Likely Scenario

Strategic acquisition by cloud platform (AWS, Google Cloud) or security conglomerate (Bosch, Axis Communications) in Year 4-5 at $300-500M valuation (12-15x revenue multiple)

Acquisition Premium Factors

- Proprietary AI/ML algorithms (demographic detection, behavioral analytics)
- Customer base across multiple verticals (retail, security, education, healthcare)

- International footprint (NA + EU + Asia-Pacific)
- Sticky product with high NRR (120%+)
- Regulatory compliance expertise (GDPR, CCPA, SOC2)

Comparable Company Analysis

Company	Focus	IPO Valuation	Current Market Cap
SentinelOne	Cybersecurity + AI	$3.2B (2021)	$8B+
CrowdStrike	Cybersecurity + AI	$3B (2019)	$70B+
Zscaler	Cloud Security	$1B (2018)	$30B+
Verkada	Security + AI	$1.6B (Series D, 2021)	2B+ (estimated)

Why Invest in EyeNet Vision?

Strategic Advantages

- **Proven Market Demand:** $2-4B TAM across multiple verticals
- **Defensible Technology:** Proprietary demographic detection and behavioral analytics
- **Rapid Deployability:** Works on standard hardware, minimal infrastructure
- **Multiple Revenue Streams:** B2B + B2C reduces dependency on single market
- **Scalability:** From 1 camera to 10,000+ cameras on same platform
- **Strong Unit Economics:** CAC payback in 3-4 months (B2B), 1-2 months (B2C)
- **Clear Path to Profitability:** Profitable by Year 2, strong margins by Year 3
- **Experienced Team:** Track record with PPL Meta platform

Risk Factors & Mitigation

1. Regulatory & Privacy Compliance

Risk: GDPR, CCPA, facial recognition bans limit market opportunity

Mitigation:

- Modular design allows disabling demographic features
- Age-only detection reduces PII collection
- On-premises deployment option for sensitive environments
- Built-in compliance controls (data retention, export, deletion)

2. Market Competition

Risk: Large players (Google, Amazon, Meta) enter with massive resources

Mitigation:

- Vertical specialization (6 focused applications vs. horizontal platform)
- Proprietary algorithms and IP portfolio
- Strong customer lock-in through integrations
- Agile product development cycle

3. Technology Execution

Risk: Security Officer Agent hardware delays (smart glasses development)

Mitigation:

- Software-first approach (5 other products ready)
- Partner with hardware manufacturers vs. build in-house
- Flexible roadmap with prioritized product launches

4. Customer Concentration

Risk: Early-stage dependency on pilot customers (potential for high churn)

Mitigation:

- Diversified customer base across verticals
- B2B + B2C dual model reduces single-segment risk
- Focus on land-and-expand with enterprise customers
- No customer >15% of revenue policy

5. Market Adoption

Risk: B2C consumer adoption slower than projected

Mitigation:

- Conservative penetration assumptions (0.5-2%)
- Freemium funnel to convert free users
- B2B focus provides revenue stability if B2C underperforms
- Multiple product options increase conversion opportunities

6. Geopolitical & Economic

Risk: Economic downturn reduces enterprise IT spending

Mitigation:

- Compliance products (Room & Gate Protection, Underage Detector) are non-discretionary
- Security spending remains stable in downturns
- Multiple geographic markets reduce regional dependency
- Flexible pricing models adapt to market conditions

Investment Decision Framework

✅ Why Invest in EyeNet Vision?

- **Strong Market Opportunity:** $2-4B TAM with growing post-pandemic demand
- **Proven Technology:** Beta-ready products with pilot customer validation
- **Diversified Revenue Model:** B2B stability + B2C volume
- **Compelling Unit Economics:** CAC payback <6 months, 65-70% gross margin
- **Clear Path to Exit:** IPO $500M-$1B or strategic acquisition $300-600M
- **Attractive Returns:** 13-18x returns for early investors (65-78% IRR)
- **Seed Return Basis:** Calculated from immediate Seed terms of $2.5M at $10M pre-money (20% initial ownership)
- **Experienced Team:** Proven track record with PPL Meta platform
- **Multiple Exit Paths:** Strong strategic and financial buyer interest

❌ When to Pass

- **Regulatory Exposure:** Uncomfortable with facial recognition regulatory risk
- **Execution Risk:** Concerns about team's ability to scale sales/marketing
- **Market Timing:** Belief that security spending will contract significantly
- **Competition:** View that tech platforms will commoditize vision AI rapidly
- **Capital Intensity:** Concern about capital requirements to profitability

Key Performance Indicators to Monitor

Financial KPIs

- **ARR (Annual Recurring Revenue):** Primary growth metric, track vs. plan
- **MRR Growth Rate:** Month-over-month momentum indicator
- **Gross Margin:** Target 65-70%, expanding to 70%+ by Series C
- **CAC Payback Period:** B2B <6 months, B2C <3 months
- **Burn Rate:** Monthly cash burn vs. runway
- **Rule of 40:** Growth rate + profit margin (target: 50+)

Customer KPIs

- **Customer Count:** B2B accounts + B2C paid users
- **ACV (Average Contract Value):** B2B target $15-20K
- **NRR (Net Revenue Retention):** Target 110-120%
- **Churn Rate:** B2B <5%, B2C <10%
- **Customer Concentration:** No customer >15% of revenue
- **Pipeline Coverage:** 3-4x pipeline-to-quota ratio

Growth & Efficiency KPIs

- **Magic Number:** >0.75 (revenue generated per sales/marketing dollar)
- **LTV:CAC Ratio:** Target 3:1 or higher
- **Sales Cycle:** B2B 6-9 months, trend downward
- **Win Rate:** Target 20-30% of qualified pipeline
- **Free-to-Paid Conversion:** B2C target 5-10%

Investment Timeline

```
2026 Q1-Q2: Immediate Seed Round ($2.5M)
  ↓
  Deploy 5-10 pilot customers, $50K-$100K ARR
  ↓
2026 Q3-Q4: Series A ($5-7M)
  ↓
  Scale to 50-75 customers, $1M+ ARR, expand to Canada + EU
  ↓
2027 Q2-Q3: Series B ($8-12M)
  ↓
  Scale to 200+ customers, $8-10M ARR, international 20-30%
  ↓
2028 Q1-Q3: Series C Optional ($15-25M)
  ↓
  Scale to 500+ customers, $30-40M ARR, profitability achieved
  ↓
2029-2030: Exit Event
  ↓
  IPO at $500M-$1B OR Acquisition at $300-600M
```

Investment Recommendation

STRONG BUY for Seed/Series A Investors

EyeNet Vision presents a **compelling venture capital investment opportunity** with large addressable market, proven technology, dual revenue model, and clear path to profitability and exit.

Risk-Adjusted Profile: Moderate risk, high return potential (13-18x returns at 65-78% IRR for early investors, based on immediate Seed at $2.5M and $10M pre-money)

Success requires excellent execution on product-market fit validation, sales/marketing scale, and international expansion. For investors seeking AI/ML, B2B SaaS, and security market exposure, EyeNet Vision represents a high-quality opportunity.
